

HASAN RAZA

Full-Stack Software Engineer | SaaS & ERP Specialist

Location: Karachi, Pakistan | **Phone:** +92 316 5825495

Email: hasan@sparkpair.dev | **Portfolio:** hasan.sparkpair.dev | **Github:** razajp | **LinkedIn:** raza-jp

SUMMARY

Results-driven Full-Stack Software Engineer with a proven track record of architecting large-scale, scalable web and mobile solutions. Specialized in the **MERN stack, Laravel, and Flutter**, with unique expertise in integrating complex hardware systems like biometric devices and thermal printers into custom ERP and POS platforms. Currently leading Spark Pair to deliver high-efficiency, multi-tenant SaaS solutions for industrial and educational sectors.

TECHNICAL SKILLS

- Backend & Frameworks:** Node.js, Express, Laravel (PHP), RESTful APIs.
- Frontend & Mobile:** React.js, TypeScript, Flutter, Dart, Tailwind CSS, GSAP.
- Databases:** MongoDB (NoSQL), MySQL, SQLite.
- Specialized Tech:** **Multi-tenant** SaaS Architecture, **Hardware Integration** (Biometric/POS/Thermal Printers), **FBR API Integration**, Real-time systems (Pusher/**WebSockets**).
- Tools:** Git/GitHub, Alpine.js, jQuery, UI/UX Interface Design.

WORK EXPERIENCE

Lead Full-Stack Developer & Founder | Spark Pair (Karachi)

February 2024 – Present

- Architected "EmbroideryOS":** Engineered a high-performance, SaaS-based MERN stack solution for end-to-end embroidery business management, focusing on scalability and data optimization.
- Optimized Business Logic:** Developed complex algorithms for automated attendance and commission calculations, reducing manual accounting errors and processing time.
- Enterprise Resource Planning:** Developed **"GarmentsOS PRO"**, a full-featured ERP streamlining production, inventory, and workforce management for large-scale factories.
- FinTech & Compliance:** Deployed **"Nova Invoice"**, a SaaS-based billing manager with direct **FBR API integration** for automated tax compliance.
- Hardware Ecosystems:** Successfully bridged software and physical operations by integrating biometric devices and thermal printers into retail and industrial POS systems.
- Product Lifecycle:** Managing the full development lifecycle, from client requirement gathering to cloud deployment and ongoing support.

Frontend Developer | Freelance

August 2023 – February 2024

- Designed and built high-performance, responsive dashboards using **React and TypeScript**.
- Optimized UI components for client projects, ensuring fast load times and mobile-first responsiveness.

PROJECT HIGHLIGHTS

- EmbroideryOS (SaaS):** A multi-tenant management platform for the embroidery industry featuring real-time work tracking and automated payroll.
- GarmentsOS PRO:** A specialized ERP system that provides real-time insights into factory production, billing, and workforce efficiency.
- Edusaas:** A high-efficiency School Management SaaS featuring QR-based parent access and automated academic reporting.

EDUCATION

- Advanced Diploma in Software Engineering (ACCP Prime 2.0)** | Aptech NK | **In Progress.**
- Intermediate (Pre-Engineering/CS)** | Government College, Karachi | **In Progress.**
- Matriculation** | G.B.S.S | April 2024.
